the lightbulb you can hold

muscar
fluffy lights

muscar is a decorative lightbulb made to be held. It is the first ever bulb that can be experienced for its warmth and feel as well as its lighting.

The coating on muscar's surface is translucent and heat resistant, so it allows for the light to go through while transmitting the bulb's heat in a different way.

So muscar can be left on a soft surface such as a cushion, a blanket or the sofa, without damaging them. And it can sit on your lap, while you read.

Muscar is a low energy consumption bulb with a 10year life span.
